

Greenhouse Enhanced Solar Module

ValuHeat2™

New Patent Pending professionally engineered Greenhouse Enhanced Solar Module. Designed to maximize solar energy to supply heated water for large commercial or residential pools. Also acts as a heat exchanger to heat interior air.

ValuHeat2™ New Green Technology
Uses recycled resins.

ValuHeat2™ Benefits

- Easy to install or retrofit
- No moving parts
- Very low maintenance
- Low cost per square foot of solar collection
- Exceeds efficiency of anything currently on the market including vacuum tube collectors
- In excess of 40,000 BTU's per module per day
- ROI under 4 years

ValuHeat2™ Materials

- UHMW (ultra high molecular weight) polyethylene
- Greenhouse shield is polycarbonate

ValuHeat2™ Technical Information

Each solar module with water weighs 140 lbs or 7 lbs per sq ft
1-100 units 4" pipe • 100+ units 6" pipe

ValuHeat2™ Shipping Information

- Modules are 92x30x4 inches (can ship UPS oversized)
- 40 lbs. shipping weight
